Over a Century of Expertise

Since 1898 Harris® Wood has been crafting hardwood flooring of exceptional quality. The foundations that built the Harris Wood legacy are still just as strong today—our commitment to quality and a responsibility to the environment. And the most important commitment of all—the one we make to you, our customer: That our extraordinary customer service and our superior products exceed your expectations.

Made in America for 112 years.

And counting.

Unparalleled Commitment to the Environment

Harris Wood provides one of the most

ENVIRONMENTALLY

sound flooring options available today.....

Durable, hypo-allergenic and can be refinished rather than replaced, preserving our floors for generations

VOC and formaldehyde free finishes

Exceed the requirements of the CARB 93120 Standards which reduce air pollution caused by chemicals

Only utilize timber harvested from sustained forests that are managed through strict preservation and replenishment programs

Reduce gas emissions by sourcing 100% of our domestic species from forests within 500 miles of our plant

Comply fully with the Lacey Act which protects against illegal harvesting and trade practices

Certified by the International Forest Stewardship Council to utilize FSC certified wood

Utilize 100% of the tree... even the sawdust is used to fuel our factory

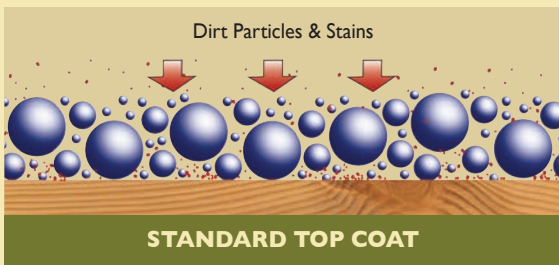

The Defining Difference

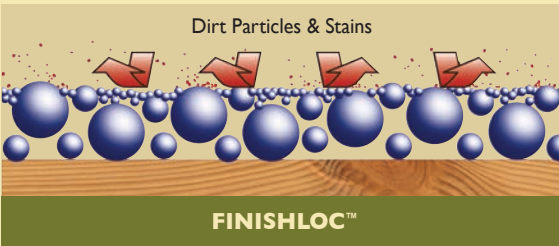

FINISHLOC™, available on Harris Wood Floors exclusively, is an advanced, proprietary finish system containing millions of microscopic particles that form a shield to “Loc” in and protect the finish. Traditional finishes allow dirt particles and stains to penetrate which leads to dull, scuffed floors overtime.

FinishLoc Lifetime Warranty Provides Superior Protection

Traditional finishes allow dirt particles and stains to penetrate which leads to dull, scuffed floors over time.

Advanced finish system contains millions of microscopic particles that form a shield to “Loc” in and protect the finish.

WEAR & SCUFF RESISTANCE

Ten Times more abrasion resistant when tested against finishes that contain Aluminum Oxide alone

GLOSS RETENTION

Finishes maintain their original transparent shine allowing the beauty of the wood to show through

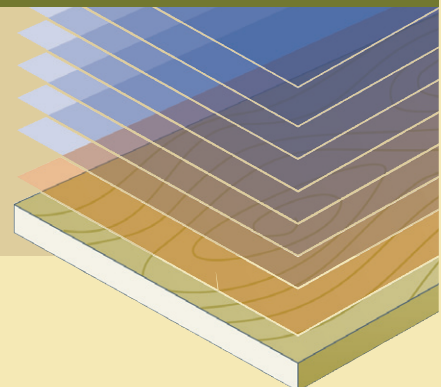

STAIN RESISTANCE

Household spills such as mustard, shoe polish and markers clean right off !!!

Not Just a Top Coat

*S*tain & 7 layers of aluminum oxide enhanced FinishLoc are applied, sanded and UV cured making the finish ultra strong.

American Cherry Cobblestone

Engineered-Surface Textured

Craftique Tejas™

Cross-directional scraping with dramatic texture variations

Inspired by the rugged beauty of natural stone, the Craftique Floors feature bold cross-directional hand-scraping that creates dramatic texture variations. Complements decors incorporating stone, granite, marble, slate, tile or brick.

Dimensions: 5" width x 1/2" thick x random lengths

Edge Treatment: Hand-beveled edges and ends

Finish: Matte with FinishLoc

Warranty: Lifetime Residential Finish and Structural Warranties

Maple Golden Palamino, HE2163

Maple Dark Canyon, HE2165

Maple Autumn, HE2166

HE2163,
Engineered Hand-Scraped,
Craftique Tejas, Maple Golden Palamino

Craftique Textures™

Cross-directional scraping with dramatic color and texture variations

Features the same rugged, cross-dimensional hand-scrape as the Tejas Collection but also incorporates a proprietary old world finishing technique. Woodworking masters apply an organic wash that penetrates the wood creating unique colorations.

Dimensions: 5" width x 1/2" thick x random lengths

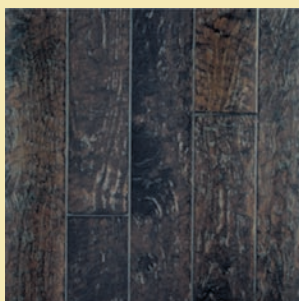

Edge Treatment: Hand-beveled edges and ends

Finish: Matte with FinishLoc

Warranty: Lifetime Residential Finish and Structural Warranties

Trailhouse Hickory™

Aggressive lineal scraping, rough random chatter marks and strong grain variation

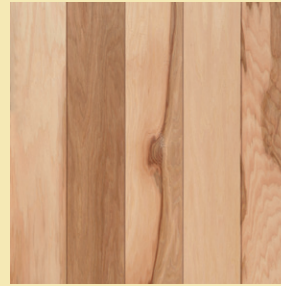

Incorporates a unique western-inspired aggressive lineal scrape that includes random rough chatter marks. These textures, coupled with the natural color variations of Hickory, create a rustic, heavily worn floor. The random appearance of this floor can be maximized by installing the pre-packaged 3", 5", 7" multi-width version.

Dimensions: 5" width, 7" width and 3", 5", 7" mixed widths x 3/8" thick x random lengths

Edge Treatment: Hand-beveled edges and ends

Finish: Matte with FinishLoc

Sunlight exposure will alter the appearance of wood floors over time. Exotic species and Domestic Exotics (American Cherry and Walnut) are typically prone to change color/tones more rapidly than other species.

**Rustic/vintage products may contain knots, burrs, mineral streaks, etc. as well as naturally occurring light and dark wood color plus grain variations.

***Important notes: Sanding will alter distressed or hand-scraped appearance. Color will remain on the edges of beveled-edge products. Distressed/scraped/wirebrushed products are random applications. These processes leave no two boards alike.

Installation Methods: Traditions SpringLoc - Float or Glue. All other Engineered Floors - Float, Glue, Nail, Staple. Solid Floors - Nail or Staple.

Recommended Subfloors: Engineered Floors - OSB, Plywood, Concrete. Solid Floors - OSB, Plywood.

Which Floor is Right for Me?

There are a number of factors other than the color and look that should be considered when selecting a wood floor:

- » Type of construction and installation
- » Hardness of wood varies by species
- » Graining, color, finish and gloss level

Harris Wood has a Floor to Meet Every Need

ENGINEERED FLOORS

Real wood beauty plus stability & versatility.

Provide superior strength and stability making the floors less susceptible to expansion and contraction.

Multiple layers of solid wood are permanently bonded together in a cross ply construction.

Float, glue, nail or staple down on any sound, flat surface.

Can be installed almost anywhere in the home...basements to upper floors.

SOLID FLOORS

The beauty & appearance of a traditional sand & finish floor.

Individual planks precisely milled from a single piece of wood.

Pre-finished so there is no mess and installation is quick.

Nail or staple down installation over OSB or plywood subfloor.

Can be installed on or above ground level.

THE HARDNESS OF WOOD

Wood hardness is important to consider if your home experiences high traffic. Any species that has a Janka Hardness rating equal to or greater than Red Oak Natural is considered to be durable.

The Janka Hardness Test is the industry standard for gauging the ability of various species to tolerate denting and normal wear. It is a measurement of the force necessary to embed a .444-inch steel ball to half its diameter in wood.

Harris Wood selects durable species that will offer years of carefree enjoyment.

JANKA#	SPECIES
1260	Birch
1290	Red Oak Natural
1360	White Oak
1450	Maple (Hard)
1540	African Teak
1820	Hickory/Pecan
2160	Tigerwood
2200	Santos Mahogany
2350	Brazilian Cherry
3684	Brazilian Walnut

JANKA#	SPECIES
950	American Cherry
1010	Walnut

Recommended for Lower Traffic Homes/
Areas.

Acceptable for High Traffic Homes/Areas

OTHER FACTORS ARE IMPORTANT

Is a harder wood always a better choice for a high traffic home or area? The answer is no. There are many other factors to consider.

Graining: A wood species that features heavier graining will conceal any of life's little accidents. For example, even though Maple is a harder wood than Oak, scratches will be more apparent on its clean face.

Gloss Level: A matte finish will show fewer scratches than a higher gloss finish.

Color: Dark colors will show dust, pet hair, etc. A lighter or natural floor will not show dirt as easily.

Finish: Kids? Pets? A surface textured floor may be the perfect choice. Any aging added to a hand-scraped or distressed floor will only enhance its appearance.

MOLDINGS: THE FINISHING TOUCH

Harris Wood offers a broad line of moldings to coordinate with every one of our floors. Be sure to maximize the impact of your new floor by using matching quarter rounds, carpet reducers, baby thresholds and stairnoses.
