Commercial Mass Transit			X		

Care and Maintenance

Clean surface with any non-abrasive cleanser or chemicals such as ammonia or vinegar. Spray your cleaner first on a clean cloth, then wipe the surface. Follow by wiping with a clean, dry cloth.

For stubborn, dried on debris, use a new single-sided razor blade at an angle and scrape the surface clean. Be careful not to gouge the surface of the glass and leave a scratch.

TPURE LIT

PURE™
custom glass tile surfaces

PURE

When it comes to color and size, choice equals creativity.

PURE™ provides both!

First, the most comprehensive color solutions with a limitless palette of colors. The enduring color of this tile lies beneath its clean, crisp 8mm PPG Starphire™ Ultra-Clear glass which provides optimum color consistency and depth.

Second, PURE™ offers a variety of large format tiles, starting at 4 inches and ranging in sizes up to 18 inches with custom sizes and shapes available. Each tile is supplied with a standard polished and beveled edge adding a clean finish to any residential or commercial interior installation.
